### N10 GENERAL FIXTURES/ FURNISHINGS/ EQUIPMENT

#### 300 ENTRANCE MATTING:

KS Entrance Systems Ltd manufactures three types of entrance matting products under the ZENOPROTECT® brand name.

Click on the name below to jump to the product description and specification.

[Protect Super Clean-Off-Zone](#)

A tufted pile antistatic matting with a rubber/vinyl secondary backing.

[Protect Solution Clean-Off-Zone](#)

A tufted pile antistatic matting, with a rubber/vinyl flexible secondary backing, for use where a higher standard of appearance is required.

[Protect Star Clean-Off-Zone](#)

A weather and ultra violet resistant extruded vinyl entrance matting system designed to remove coarse dirt for use internally and externally.

#### **Protect Super Clean-Off-Zone**

A tufted, tetralobal polyamide pile antistatic matting with a rubber/vinyl secondary backing, designed to remove dirt and moisture from foot traffic, in entrance and lobby areas.

Protect Super is 9mm thick and available in twelve multi-colours, in rolls approximately 25 metres long and 2 metres wide. A cut length service is also available.

The matting is secured using an acrylic adhesive in accordance with the manufacturer's instructions.

Maintenance is spot cleaning and regular vacuuming using a machine with a rotating brush and powerful suction. Periodically deep clean using a water spray and extraction or a dry chemical system.

Consult KS Entrance Systems Ltd technical literature for details. KS Entrance Systems Ltd can also provide a design and specification advisory service and it is recommended that they be consulted early in the design process.

**Manufacturer:** KS Entrance Systems Ltd, PO Box 29, Knaresborough HG5 9XJ Tel: 01423 865011 Fax:01423 862679. Email: [info@zenoprotect.co.uk](mailto:info@zenoprotect.co.uk) Web: [www.zenoprotect.co.uk](http://www.zenoprotect.co.uk)

**Product reference:** Protect Super Clean-Off-Zone

**Colour:** 3015 / 3041 / 305 / 302 / 303 / 307 / 3055 / 3061 / 3045 / 3025 / 3035 / 3071

**Size:** 2 metre wide x / 25 metre roll / cut length

**Installation:** Carpet bonded, in accordance with the adhesive manufacturer's instructions, with Laybond 78HT or F. Ball F45.

### **Protect Solution Clean-Off-Zone**

A tufted pile antistatic matting with a rubber/vinyl flexible secondary backing, for use where a higher standard of appearance is required, designed to remove dirt and moisture from heavy foot traffic in entrance and lobby areas.

Protect Solution is 9mm thick and available in five rich lustre multi-colours, in rolls approximately 25 metres long and 2 metres wide. A cut length service is also available.}

The matting is secured using an acrylic adhesive in accordance with the manufacturer's instructions. Loose lay mats are available on request.

Maintenance is spot cleaning and regular vacuuming using a machine with a rotating brush and powerful suction. Periodically deep clean using a water spray and extraction or a dry chemical system.

Consult KS Entrance Systems Ltd technical literature for details. KS Entrance Systems Ltd can also provide a design and specification advisory service and it is recommended that they be consulted early in the design process.

**Product reference:** Protect Solution Clean-Off-Zone

**Colour:** 501 / 502 / 503 / 504 / 505

**Size:** 2 metre wide x / 25 metre roll / cut length

**Installation:** Carpet bonded, in accordance with the adhesive manufacturer's instructions, with Laybond 78HT or F. Ball F45.

### **Protect Star Clean-Off-Zone**

A weather and ultra violet resistant entrance matting system designed to remove coarse dirt from intensive foot traffic.

Protect Star is 14mm thick and manufactured from extruded vinyl strand, which is fused to form an entrance matting system for use internally and externally.

The matting can be cut without fraying and is resistant to seawater, organic solutions, oil and fungal growth and is also suitable for use in swimming pool surround areas.

Protect Star is available in seven colours, in rolls approximately 6 metres long and 1.2 metres wide. It can be loose laid on a smooth subfloor or into a mat well but should be allowed to acclimatise for about eight hours before being close fitted.

For cleaning, the matting can be rolled up, enabling accumulated dirt to be removed by sweeping or vacuuming. Grease and solids can be removed by high-pressure water hose but do not use bleach or hydrocarbon solutions.

Consult KS Entrance Systems Ltd technical literature for details. KS Entrance Systems Ltd can also provide a design and specification advisory service and it is recommended that they be consulted early in the design process.
